

Internship in Cryo-EM

Department of Molecular Structural Biology
(Abt. Baumeister)
Max-Planck-Institute of Biochemistry
Am Klopferspitz 18, 82152 Martinsried

Internship description

An internship opportunity is available for an individual seeking to gain experience in cutting-edge cryo-EM based structure determination methods. The candidate will be working to elucidate structural properties of AAA-ATPases that are involved in cellular protein degradation pathways. The primary role of the candidate will be to optimize cryo-EM sample preparation. In addition, he/she will participate in protein purification, mammalian cell culture, data collection and analysis.

The daily work schedule will be based on the needs of the project, and can be adapted according to the intern's availability.

Requirements

- The candidate must have an enthusiasm to work in the wet lab. Any prior wet lab experience is considered a plus.
- English communication skills.

To apply

Send your CV via email to: majumder@biochem.mpg.de before May 15, 2021.
